Are looking for excellence in your life?

Discover the New Code NLP

and

become Practitioner in New Code of NLP

Description

The New Code is the natural evolution of Neuro-Linguistic Programming (NLP), developed by one of the founders of NLP, John Grinder, in collaboration with Carmen Bostic St. Clair and in recent years with Michael Carroll. This methodology greatly increases the effectiveness of NLP by working on "patterns", or patterns of behavior, to modify those that limit us. The main difference with the "Classic Code" is that the New Code of NLP works much more with the unconscious part of the person, especially through games (New Code Games), state builders, leading to states of high performance and inducing deep and lasting generative changes.

Advantages

– Experience NLP Innovation

– Understand how it works

– Use protocols in your own personal or professional area

– Discover the power of the Process oriented protocols

– Create connections with your Unconscious mind
